DRAGON ISLAND

WHERE LEGENDS STILL LIVE

WELCOME TO DRAGON ISLAND

Dragon Island is the religious center of Elemara: a meeting place for humans, dwarves, elves, trolls, and goblins, and the home of the Sacred Dragons.

Visitors arrive through a crowded natural harbor on the sunrise shore. Five village avenues climb toward a monumental sacred terrace, a snow-capped mountain, and the forest beyond.

TRAVEL STATUS

ORIENTATION

From Harbor to Mountain

Dragon Island reveals itself in layers. The journey inland begins among ships and stonework, climbs through the five villages, and reaches the sacred plateau beneath the mountain.

1. **SUNRISE HARBOR**
   Calm water, many vessels, piers, boardwalks, and a great stone barrier.
2. **THE RISING PLAIN**
   A broad inhabited slope carries five parallel village roads inland.
3. **SACRED TERRACE**
   The village roads converge at the monumental Red Arena.
4. **MOUNTAIN & FOREST**
   A snow-capped summit rises above the terrace; forest extends beyond.

WHAT THE HARBOR VIEW ESTABLISHES

The Red Arena is the island's dominant built landmark - not a castle. It stands below the mountain at the meeting point of the village roads.

First Arrival

Approaching crews crowd the rails as the island comes into view. Sea birds wheel overhead, passengers point toward the shore, and ships maneuver into the busy harbor. Dragon Island is not isolated wilderness; it is an inhabited pilgrimage center.

LIVING ISLAND

Five Peoples, Five Villages

Five villages rise in parallel from the harbor toward the mountain. The novel explicitly places the goblin village farthest away, the elf village next, and the troll village in the center. A human avenue is also shown; the exact placement of every village remains unstated.

The Human Avenue

Deep cobblestone steps ease the climb. Open-air shops line the route, carrying the smells of roasting meat and fresh bread. The district is busy, practical, and unmistakably lived in.

The Goblin Village

A narrower, less-traveled path leads to a broad avenue of empty shops and abandoned stalls. The reason for the village's condition is not established. Visitors should not mistake uncertainty for permission to trespass.

ISLAND LAW: NO SLAVERY

There are no slaves on Dragon Island. The rule applies at arrival: a person brought ashore in bonds must be released before proceeding.

Mixed Parties

Travelers who refuse to separate by village may be directed to a shore encampment. The encampment described in The Blue Planet is austere: tattered tents, worn utensils, and a central fire pit with logs for seating.

VISITOR CONDUCT

Respect village boundaries, follow guide instructions, and remember that Dragon Island is a sacred homeland - not a themed attraction.

THE SACRED DRAGONS

Elemara's dragons are immense Komodo dragons - not winged, fire-breathing creatures. Adults are at least fifteen feet long, with sprawling legs, heavy bodies carried close to the ground, and powerful trailing tails.

Recognizing a Dragon

- Broad, rounded mouth and strong jaws
- Constantly flicking forked tongue
- Low, deliberate Komodo-dragon movement
- Fast-acting venom delivered by a bite
- Predatory patience rather than fantasy spectacle

CRITICAL SAFETY RULE

Never approach, feed, touch, provoke, or attempt to photograph a dragon outside the location and distance established by an authorized guide.

Observed Feeding Pattern

In the Red Arena, dragons divide around the volunteers, bite, and wait for the venom to act before feeding. Larger dragons can swallow a person alone; smaller dragons may feed together.

What Remains Unknown

The novel does not settle their intelligence, language, social organization, or precise relationship to the Dragon Gods. Official materials must not turn speculation into fact.

SACRED CENTER

The Red Arena

From the harbor, the island's dominant structure resembles a monumental temple. At close range it reveals its full purpose: a vast pale-stone stadium where the public dragon rite is performed.

Inside the Arena

- A long, dark entrance tunnel
- Vivid green grass across the arena floor
- Great tiers of pale stone seating
- Thousands of assembled worshipers
- Field-level gates for volunteers and dragons

The Ceremony

Volunteer sacrifices from all the peoples enter in simple white garments and present themselves to the dragons. The dragons bite, wait for their venom to take effect, and then feed. The crowd regards the act as honorable and sacred.

A Disputed Meaning

The island's teaching says the Sacred Dragons protect Elemara and that the rite serves the good of all. A free goblin priest rejects this reading, teaching that sacrifice means giving oneself for another. Official visitors must understand that the island contains genuine religious disagreement.

VISITOR ADVISORY

The Red Arena ceremony includes human death and predation. Treat the site with seriousness; do not trivialize, reenact, or sensationalize the rite.

BEFORE YOU DEPART

Plan a Responsible Visit

ACCESS

Advance authorization is required. Independent travel is prohibited. Confirm approved transport, guide arrangements, and current restrictions before departure.

Climate and Clothing

Dragon Island has a temperate maritime climate. Wind, rain, and temperature can change rapidly. Bring layered clothing, rain protection, sturdy walking footwear, and only the equipment permitted by your guide.

Before Entering a Village

- ☐ Know which village and route your authorization covers.
- ☐ Respect cultural boundaries and sacred spaces.
- ☐ Never bring another person ashore in bondage.
- ☐ Do not enter abandoned buildings or stalls without permission.
- ☐ Remain with the mixed-party encampment if directed there.

At Sacred Sites

Follow local priests and authorized guides. Keep voices low where directed. Photography, recording, and close observation of dragons may be limited. A destination guide never overrides an instruction given on site.

Remember

Dragon Island is a sacred homeland first and a visitor destination second.
