OFFICIAL PUBLIC INFORMATION

Welcome to Elemara

Welcome to Elemara.

On behalf of the United States Interstellar Colonization Authority, we are pleased to welcome you to humanity's newest permanent home beyond Earth.

Whether you have arrived as a settler, researcher, educator, government employee, or official visitor, you are now part of one of the most significant chapters in human history. For the first time, humanity is building a permanent civilization around another star.

Elemara is a world of remarkable natural beauty, diverse cultures, and extraordinary opportunities for discovery. It is also a living home to peoples whose histories extend far beyond humanity's arrival. Respect for local customs, responsible stewardship of the environment, and cooperation with our neighbors remain essential to the continued success of the colony.

This publication provides an introduction to the communities, destinations, publications, and services available through USICA. It is intended to help you begin your journey safely, confidently, and with a deeper appreciation for the world you now share.

Additional publications are available for specific destinations, transportation, language resources, maps, and visitor services. Current editions may be obtained through the Office of Visitor Information or downloaded from VisitElemara.com.

Welcome to Elemara.

We hope your time here will be rewarding, enlightening, and memorable.

About Elemara

Elemara is humanity's first permanent extrasolar colony and the newest member of the growing family of inhabited human worlds.

Located approximately two hundred light-years from Earth, the colony represents one of the greatest achievements in human exploration, scientific cooperation, and long-term planning. Although communication with Earth remains limited by the speed of light, Elemara has become a thriving and self-governing community committed to building a prosperous future for generations to come.

Unlike earlier exploratory expeditions, the settlement of Elemara was established with permanence in mind. Communities, institutions, schools, research facilities, and public services continue to expand as the colony grows.

Visitors quickly discover that Elemara is remarkable not only for its mountains, forests, oceans, and marshlands, but also for the diversity of intelligent peoples who have called this world home for countless generations. Respectful cooperation between cultures has become one of the defining principles of modern colonial life and remains central to USICA's mission.

Whether your interests include history, science, language, exploration, or cultural exchange, Elemara offers opportunities found nowhere else in human experience.

Quick Facts

Designation	Elemara
Classification	Terrestrial Planet
Primary Settlement	Grayhaven
Human Settlement Established	2184
Status	Permanent Human Colony
Administrative Authority	United States Interstellar Colonization Authority (USICA)
Official Language	English (USICA); numerous indigenous languages are also spoken
Time Standard	Elemara Standard Time (EST)

A Note on Cultures

The peoples of Elemara possess long and distinct cultural traditions that predate humanity's arrival.

Visitors are encouraged to approach each community with curiosity, courtesy, and respect. Cultural guides and language publications are available through the Office of Visitor Information to assist travelers in preparing for visits to regions throughout the planet.

Planning Your Journey

Exploring Elemara is one of the most rewarding experiences available to settlers and official visitors. Whether your destination is a growing human settlement, a historic cultural center, or one of the planet's remarkable natural regions, a little preparation will help ensure a safe and enjoyable journey.

USICA recommends that all travelers become familiar with local conditions before departure and consult current publications for destination-specific guidance.

Before You Travel

Before leaving Grayhaven or another established settlement, travelers should:

- Review current transportation schedules.
- Confirm local weather conditions.
- Obtain any destination-specific publications or permits.
- Notify appropriate contacts of extended travel plans when visiting remote areas.

Certain protected regions and research areas may require advance authorization. Current requirements are available through the Office of Visitor Information.

Transportation

Most established settlements are connected by maintained overland routes, waterways, or scheduled transportation services.

Travel conditions may vary seasonally. Visitors are encouraged to consult the most recent transportation advisories before departure.

Independent travel into unsurveyed regions is discouraged except as part of authorized expeditions.

Respecting Local Communities

Elemara is home to cultures whose histories long predate humanity's arrival.

Visitors are expected to:

- Observe local customs.
- Seek permission before entering private or ceremonial areas.
- Follow the guidance of local hosts and community leaders.
- Respect cultural traditions, sacred places, and historic sites.

Courtesy and patience contribute greatly to successful cultural exchange.

Protecting Elemara

The natural environments of Elemara are among the planet's greatest treasures.

Visitors should remain on established routes where provided and avoid disturbing wildlife or collecting plants, animals, or geological specimens without proper authorization.

Protected areas help preserve these environments for future generations.

Additional Information

Additional guidance is available through USICA destination guides, language publications, geological surveys, and visitor information offices.

Current editions are available at Visitor Information Centers and through VisitElemara.com.

Traveler's Tip

Carry the destination guide for each community you plan to visit. Local customs, transportation information, and seasonal conditions may differ considerably between regions.

Featured Destinations

From thriving human communities to ancient cultural centers and remarkable natural landscapes, Elemara offers experiences found nowhere else. The following destinations are among the most frequently visited and provide an excellent introduction to the diversity of the planet.

Grayhaven

Gateway to the Interior

Place the Grayhaven poster here.

Grayhaven serves as the administrative center of the human colony and is the starting point for most official travel. Visitor services, transportation, government offices, museums, and public accommodations are located throughout the city.

See: *USICA TR-001 – Visit Grayhaven*

Ssalith

Beautiful Marsh

Place the Ssalith poster here.

Built among the waterways of the southern marshlands, Ssalith is renowned for its graceful architecture, rich cultural traditions, and remarkable natural beauty. Visitors will find one of Elemara's oldest continuously inhabited cities.

See: *USICA TR-002 – Visit Ssalith*

Stonehearth

Heart of the Mountains

Place the Stonehearth poster here.

Stonehearth is recognized for its engineering traditions, impressive stone construction, and spectacular mountain scenery. The city serves as an important center of craftsmanship, mining, and geological research.

See: *USICA TR-003 – Visit Stonehearth*

Dragon Island

Protected Natural Reserve

Place the Dragon Island poster here.

Dragon Island preserves one of Elemara's most significant natural environments. Visitor access is limited to authorized programs in order to protect sensitive ecosystems and cultural sites.

Official Maps

USICA Geological Survey publications provide current cartographic information for travelers, researchers, educators, and public agencies operating throughout the colony.

Maps are updated as new regions are surveyed and transportation networks expand. Visitors are encouraged to obtain the most recent editions before traveling beyond established settlements.

Currently Available

GS-001
Planetary Overview Map

The official reference map of Elemara showing major settlements, transportation corridors, surveyed regions, and protected areas.

Figure 1.

General reference map of the inhabited regions of Elemara. Detailed regional maps are published separately.

Traveler's Note

Maps should always be used together with current destination guides and transportation advisories. Environmental conditions and public access may change over time.

Future Survey Publications

As exploration continues, additional maps will become available, including:

- Regional Topographic Maps
- Transportation Maps
- Protected Areas Maps
- Geological Survey Maps
- Cultural Heritage Maps

Current publication status is available through the Office of Visitor Information.

About USICA

About the United States Interstellar Colonization Authority

The United States Interstellar Colonization Authority (USICA) was established to support humanity's permanent settlement beyond Earth through exploration, public administration, scientific research, transportation, and international cooperation.

Working in partnership with local governments and communities, USICA provides essential public services while encouraging responsible stewardship of the planet's natural and cultural resources.

Through its publications, educational programs, visitor information services, and scientific surveys, USICA seeks to ensure that both residents and visitors can safely explore and better understand humanity's newest home.
